Re: Los Angeles County Project Number R2009-02089-(5), Ave B / 210th St. West

Dear Sirs:

Antelope Valley Conservancy has been directed by legal counsel to notify NRG Solar / NRG Alta Vista LLC that only communications from Antelope Valley Conservancy ("AVC"), on our letterhead, are legitimate communications from our corporation. AVC is a public benefit corporation that acquires and stewards habitat lands, facilitates CEQA mitigation. AVC holds California Department of Fish and Game Authorization to Hold Mitigation Lands and Conservation Easements for jurisdictional mitigation.

NRG negotiated with David K. Jefferies, an individual with no history of mitigation implementation, in regard to the above referenced project, after which Mr. Jefferies filed Articles of Incorporation and other filings using the name Rural Antelope Valley Conservancy, and during which he may have represented himself as the Antelope Valley Conservancy. Please be apprised that AVC issued a cease and desist letter for trade name infringement to which Mr. Jefferies responded with written assurance that he would not use the name. Yet, a week later, he submitted filings using the name, reportedly to fulfill NRG's conditions for payments to himself and others for legal fees, mitigation fees, title or easement transfers, or other valuable consideration to satisfy negotiations with NRG, as represented by Ray Kelly and Keith Latham. The confusing and unauthorized use of our trade name and reputation is damaging to AVC and the public, and diverting public resources to defend actions that are being advanced with NRG's funding.

Therefore, we hope that NRG shares AVC's interest in amiable stakeholder relationships and will contact us to discuss NRG's cooperation toward an amiable resolution.

Sincerely,

Wendy Reed
President
